Ortega y Gasset (Spain)

de Ortega y Gasset

I. Intellectual who lives by his principles

II. Liberalism

III. World-view

IV. Soy yo, y mi circumstancia

Ortega y Gasset 1988 – I argue that in fact this is the whole philosophy – different from Latin

America which is more intellectual formation and world-view only and my own in Spanish – some similar naming process in Latin America – many such traditions actually.

I am the most important Ortega y Gasset according to me – I am arguing that in fact it is more than just intellectual and world-view such processes – it is in fact existentialism which is about soy yo, y mi circumstancia which ruminates on some topic per day.
